What is writing actually good for?
It doesn’t bring me any good
It’s just a childish way for me
To pass some time, to not get bored
That is all, and nothing more
It is not some fancy way
In which I can actually say
Some of what I really think
Or a little of my feels
It is only just some words I write
On a paper or device
It’ s a way to help me feel
That my head is calm, and brings
Joy to this stupid brain
That won’t really help
It likes to laze, to not think at all
Because it’s simple to just be told
“Look at this, learn all of that
It will help you, I can vouche”
This are the words most spoken
Or not? Of course, I’m lying
